ANOMALIES and IDIOSYNCRASIES:

1 - To distinguish "Z" from "C" on phone, it is common practice to say "zed" (an old British phonetic) for "Z", especially when saying a call sign. "Zed" is shorter (one syllable vs. two for "zulu".) However, in formal traffic, the ITU: "ZULU" is more correct and proper.

2 - "ROGER" (an early phonetic) is still used for "received" (equivalent of sending "R" in Morse) - It does NOT mean "yes" or "affirmative". It only means: "I have received your message completely."
